About Me

Rahul is a certified digital transformation leader with 13+ years of IT experience with 11+ years of Workday and has experience working on large global projects across Workday and Enterprise Application development. He has demonstrated experience in business analysis, solution architecture, Software development, HR/Financial Technology Implementations, Stakeholder management & Practice development.

Rahul has spent years in Architecting and delivering business solutions for clients across multiple industries and has been involved and engaged in the complete lifecycle of a project, from analysis and build, through to testing and documentation. He has been part of 30+ successful Workday deployments with a focus on technical configuration, technical program Manager and integrations Architecture along with functional setup. He brings a wealth of experience in implementing Payroll Integration with vendors like ADP, RAMCO, Ascender Preceda, Ceridian Dayforce, SumTotal, Sage Micropay, Aurion and iChris21 across a variety of industries. He also has experience in implementing and leading HCM (Human Capital Management), Recruiting, Financial and Learning Implementations as Technical Program Manager and Technical Architect.

He is Workday Certified and is a multi-skilled professional with a superb record of accomplishment of managing complex HCM, Payroll and Finance Cloud implementations. He also has experience in Workday Prism Analytics REST API.

He has successfully led and delivered the sales presentation for prospects along with helping the sales team across multiple proposals related to Integration Strategy, future IT landscape, BD orals and Architect.

He is also involved in helping in growth of the practice by leading/involving in the initiatives such as GDC (Global Delivery Center) Integration delivery model, Recruitment, resourcing & forecasting, Company Strategy to maintain Team utilisation & Margins, Mentoring the team along with expanding the Workday Extend & Build and Implementation practice in the region as a Business leader.

Professional experience

Mivada | Solution Architect

2024-Present

- Lead Workday Extend Technology Onboarding.
- Architecting on significant HCM transformation program with complex integrations and 3rd Parties.
- Influencing business outcome decisions with the Executives and Technology heads.
- Provide architecture (business & technical) direction setting for a story/epic/feature.
- Deliver an end-to-end technical outcome by orchestrating delivery across one or more domains.
- Align application Architecture to technology strategy and architectural principles /patterns.
- Strategising and leading towards Workday Practice growth in the region.
- Stakeholder Management & Strategy formulation.

Collaborative Solutions | Senior Manger

2019-2024

- Managing resourcing, Budget and forecast.
- Providing Strategic inputs to increase company Margins & boost practice utilisation.
- Part of Pre-sales team to lead Integration workstream, Delivering orals & Business development sales.
- Provided technical leadership and oversight on Workday implementation projects. Successfully lead multiple complex Projects.
- Experience deploying complex financial implementations.
- Managing all phases of the implementation methodology and ensuring the quality of the deliverables for area(s) of responsibility.
- Advising customers on the middleware strategy and future state system architecture.
- Leading consultative Planning, Discovery, Design and Solutions Review sessions for global audiences by providing demonstrations and engaging key customer resources to fully understand business requirements.
- Providing Advisory services for customers to drive Return on Investment on their Digital transformation journey.
- Experience across various Workday modules such as HCM, Payroll, Financials, Learning, Recruiting, Expenses, Prism.
- Developing unique solutions to meet customer needs across countries, leveraging the suite of global HCM functionality and optimising security configuration to support various service delivery models.

Achievements

- Attended Workday Altitude, 2020
- Participated in Workday Extend Hackathon, 2020
- Participated in Workday Extend Hackathon, 2021
- Participated in Workday Developer Conference, 2024
- Contributed White Paper for Integrating GL system with Workday US Payroll.
- On the Spot Award (2013) - TCS
- Project Applause Award (2015, 16)- Deloitte US India
- Top Rater for the year 2015-2016- Deloitte US India
- Qantas Thankyou Award (2017,2018) – Qantas
- Best Project team (2018)- Qantas
- Leadership Applause(2024), Collaborative Solutions

- Function as Customer Success Manager on the project to support and mentor new Integration lead.
- Worked on Integrations across all modules utilising all the tools available as part of Workday tech stack.
- Architected and Prototyped Workday Extend application for recording Superannuation and Tax details in Workday for APAC customers.
- Providing optimal architecture design of Workday Extend application landscape with focus on consolidations, automation, reporting, maintenance, and operational efficiency.

Deloitte | Integration Architect 2018-2019

- Integration Architect and Lead to support Payroll and learning Implementation.
- Supported Ramco to get their connector certified as GPC solution.
- Manage Project Plan and deliverables across team.

Mivada | Integration Lead 2017-2018

- Integration Lead and Developer to support phase X deployment across Core HCM modules for Qantas.
- Build complex integration across Time & Absence utilising Workday Studio.
- Provided advisory support across Workday strategy .
- Assist clients in fully designing and deploying the Workday system into their business and provide input on best practices.
- Advise clients on choices, potential risks or impacts on other systems or business processes.

Deloitte | Integration Lead 2014-2017

- Integration Developer to support Phase 1 deployment across Core HCM modules for multiple client.
- Involved in end-to-end life cycle of the project implementation.
- Managed & Build complex GL integration and published Whitepaper.

TCS | Senior Software Dev 2012-2014

- Worked on Risk application service (Credit Risk) of Deutsche bank as a Senior Java/Flex Developer using technologies like Core JAVA, MySQL, Ibatis, ActionScript, Apache Flex, REST/SOAP API, and Spring framework for developing business Layer and Junit Framework for unit testing

About Me

Experienced Management Consultant with 15+ years across ERP and SaaS solutions, including 10+ years specializing in Workday. Proven expertise in Core HCM, Benefits, Compensation, Reporting, and managing historical data, with a strong track record leading implementations, integrations, and global transformation projects. Skilled in project management, stakeholder engagement, and client advisory, consistently delivering business value through process optimization, data accuracy, and streamlined reporting. Proficient in advanced Excel for analysis and adept at leveraging Workday tools and integrations to drive successful outcomes.

Professional

Workday Functional & Data Conversion Lead

2021 - 2025

- Coordinated all phases of the Workday project, from initial planning and requirements gathering to configuration, testing, and go-live.
- Gathered and analysed current job architecture and business processes, and related areas, to identify gaps and opportunities for optimization.
- Configured Workday modules, including setting up business processes, security roles, reporting, dashboards
- Directed all phases of the Cynergy™ implementation methodology, ensuring delivery quality and compliance with project scope.
- Designed and executed cutover strategies for initial, cross-platform, and Phase X deployments.
- Led Worker Data Conversion across 15+ Workday implementation projects, covering HCM, Compensation, Benefits, Absence, Recruiting, Performance & Talent, and Payroll.
- Guided clients in configuring complex data conversion requirements, including transactional and organizational history validation.
- Created and managed detailed data conversion plans, coordinating with cross-functional teams to meet critical milestones.
- Developed and delivered Worker Data file layout templates, enabling clients to extract, map, and validate legacy system data into Workday.
- Built and deployed custom validation reports, improving client data accuracy across multiple conversion cycles.
- Loaded Worker Data using iLoad, EIB, Advanced Loads, and OX/OX 2.0.
- Partnered with clients to analyze data issues, resolve gaps, and optimize migration outcomes.

Achievement

- Mentor of the Year-2023

Workday Practice Manager

- Relocated to Melbourne to establish and scale DXC's Workday Practice in ANZ, replicating proven models from Europe and North America.
- Served as 2IC to the Workday Practice Partner, helping shape strategy, delivery frameworks, and go-to-market positioning.
- Acted as Workday Delivery Lead for Australia's largest telecommunications provider, recruiting and mobilizing a delivery team to support post-deployment operations and enhancements.

Workday Functional and Data Consultant

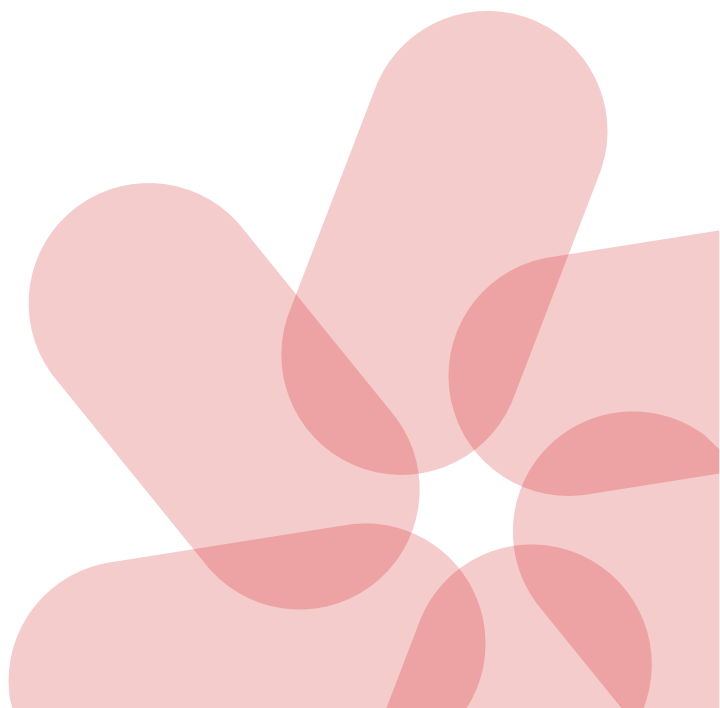

2018- 2020

- Lead Benefits Consultant for a world-renowned luxury department store, ensuring accurate and compliant Benefits configuration and rollout.
- Provided subject matter expertise in Workday Data Conversion, Benefits, and cross-application integrations for enterprise-scale deployments.
- Lead Data Consultant for the UK's largest co-operative, driving Europe's biggest Workday Payroll implementation.

Solutions Delivery Consultant

2013- 2015

- Project managed implementations of Darwin, a global employee benefits management solution, across diverse client environments.

About Me

Sally is an experienced Workday Consultant with a strong track record in delivering full-scale global Workday implementation across regions including Asia, Europe, North America, and the Middle East. She was the functional lead managing multiple functions including Core HCM, Absence, Compensation, Talent & Performance, Recruiting, and Benefits, with deep expertise in Core HCM configuration, including Supervisory Organization design, security setup, and business process configuration.

Her background also includes several years of experience as a Workday trainer, where she delivered comprehensive training programs across both HCM and Financial modules. These sessions were designed for internal teams, partner consultants, and clients, with a focus on knowledge transfer and end-user enablement. She is adept at facilitating both in-person and virtual training, including train-the-trainer programs, ensuring that stakeholders gain the confidence and understanding needed to effectively use the Workday platform.

She brings a balanced combination of technical knowledge and business insight, along with strong communication and stakeholder management skills. Moving forward, she can leverage her expertise to support your team through successful implementation, user adoption, and long-term value realization from Workday.

Professional Experience

Deloitte Services Pty Ltd | Workday Senior Consultant

Jul 2025 – Sept 2025

- Support configurations and deployment activities for core HCM and Learning, ensuring alignment with client requirements
- Collaborate with cross-functional teams and stakeholders to gather requirements and resolve issues
- Plan and coordinate post-launch production migration and hypercare support

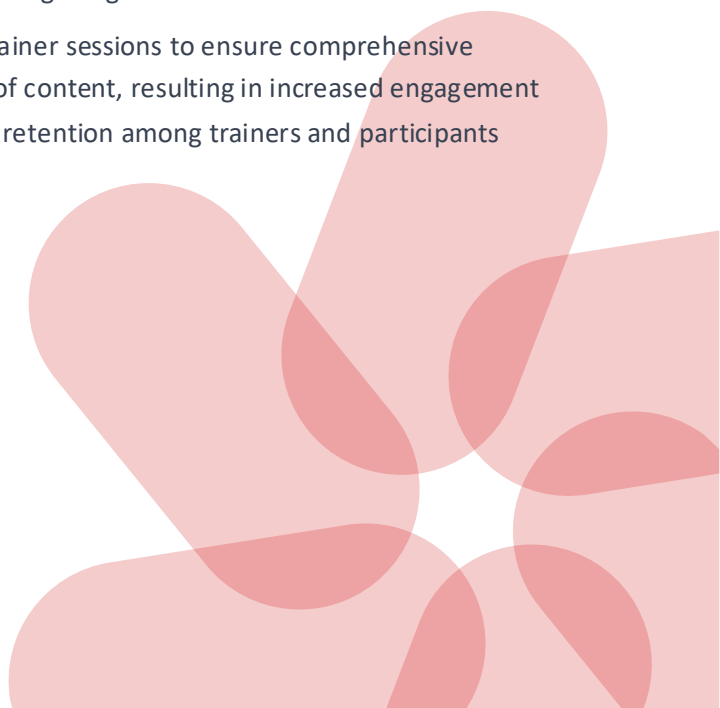

KPMG Advisory (Hong Kong) Limited | Senior Consultant
Aug 2023 – Jul 2025

Achievement

- Grater China Services Team WOW Award (Workday)
- Q1 FY23 Sub-Region Super Star (Workday)
- Q1 APJ You Rock! Culture Award (Workday)
- Successful rollout of a Workday Global Implementation across Asia, Europe, Middle East and North America

- Managed end-to-end delivery of a full-scale Workday Global Implementation across Asia, Europe, Middle East and North America
- Worked as a Workday Functional Lead overseeing 6 key Workday Functions: Core HCM, Absence, Compensation, Talent & Performance, Recruiting and Benefits
- Worked as a Workday Core HCM Lead to setup Workday key core functionalities such as Supervisory Organization Design, Security and Business Processes setup
- Provided onsite support in the US and China, conducting training sessions and assisting with UAT
- Proficient in timeline preparation, ensuring timely and successful project rollout

Workday Asia Pacific Limited | Trainer, APJ
Feb 2019 – Aug 2023

- Delivered training sessions covering 16 subjects in both Workday HCM and Financial to internal Workday consultants, Partner consultants and Workday customers, enhancing their knowledge and skills
 - Facilitated on-site trainings at customer offices and various Workday Offices across Asia Pacific Region, including Singapore and Hong Kong
 - Led train-the-trainer sessions to ensure comprehensive understanding of content, resulting in increased engagement and knowledge retention among trainers and participants
- 
- A series of overlapping, semi-transparent pink circles and ovals of various sizes, creating a decorative abstract pattern in the bottom right corner of the page.

About Me

Workday Integration Certified Consultant with 8+ years of IT experience, including 4.10 years in Workday implementation and AMS support. Delivered 7+ end-to-end Workday integration projects using Studio, EIB, PEI, PICO, CCW, DT, WEI, and Web Services, with expertise in integrating third-party systems via REST/SOAP APIs, Basic Authentication, and OAuth 2.0.

Developed and Led 2+ **Workday Extend** projects and multiple complex integration initiatives, with strong hands-on experience in PEI, Studio enhancements, and inbound/outbound integrations.

Known for a strong work ethic, passion for continuous learning, and a commitment to delivering high-quality, timely solutions.

Professional experience

Mivada Technologies Pvt Ltd | Integration Consultant.
2024 (Aug) – Present

- Led the design, development, and delivery of multiple Workday Extend applications and integrations, ensuring scalable solutions aligned with business and compliance requirements.
- Workday Extend – Australia Onboarding: Built and led implementation of an Extend app to capture Tax File Number (TFN) and Superannuation details as part of the onboarding process; integrated with Workday tasks and HCM workflows, ensuring compliance with Australian tax and payroll regulations.
- Workplace Adjustment Extend Application: Served as project lead, guiding junior developers in building an Extend app that enables employees to submit workplace adjustment requests with Send Back and Save for Later functionality, automatically routing submissions to managers for approval.
- Currently leading/working on a client engagement to load TFN and Super details using Inbound EIBs into Extend Business Objects, transmitting data to the payroll vendor through the existing PEI + SSK framework.
- Delivering a PEI integration for payroll processing, managing data related to compensation, earnings, deductions, and benefit plans, ensuring synchronization between Workday and payroll systems.
- Delivered a Workday Core Connector: Worker (CCW) + Studio integration project, overseeing end-to-end testing, issue resolution, and API-based data delivery from Workday Studio.
- Designed and implemented integrations leveraging Core Connector: Worker (CCW) and Document Transformation (DT), including full-file report integrations and complex transformation logic.
- Enhanced existing Workday Studio integrations, implementing new features and performing regression testing to ensure seamless business operations.

Awards

- **Deloitte – Applause Award**
For Implementation work.
- **Deloitte – Spot Award**
For AMS support work.
- **ADP – Service Excellence, My Moments**
For delivering client work at ADP

- Led a critical integration initiative to load and terminate 110K contingent workers, performing detailed impact analysis to prevent downstream data disruptions.
- Created comprehensive training materials, step-by-step training guides, and quiz content covering both basic and advanced Workday integration concepts; conducted onboarding and knowledge transfer sessions for new college graduates and project team members.
- Provided Business-as-Usual (BAU) support for Workday Extend and Studio-related issues, ensuring timely incident resolution and maintaining system stability.
- Contributed to multiple Proofs of Concept (POCs) for Workday integration capabilities and system enhancements.
- Mentored team members across projects, fostering knowledge sharing and professional growth within the team.

Carrier Technologies India Ltd | Lead Engineer 2024 (Feb) – 2024 (Aug)

- Led integration efforts for 4 divestiture projects (2 live, 2 in cutover) by coordinating with stakeholders, application owners, and build teams to ensure seamless data separation and system readiness.
- Supported an acquisition project involving Workday-to-SAP integration, contributing to end-to-end integration design and data flow alignment.
- Developed a bi-directional Workday Studio integration, consuming input files from business users and returning relevant Workday data using Report-as-a-Service and XSLT (with hash maps).
- Built a real-time integration combining Business Process events and Workday Studio to deliver worker address updates to an external application via API with OAuth 2.0 authentication.
- Created and managed integration security elements including ISUs (Integration System Users) and ISSGs (Integration System Security Groups) to ensure secure data access.
- Provided hypercare support, assisting application owners post-go-live and ensuring integration stability and user confidence.
- Collaborated with the Production Support team to resolve issues and fulfill enhancement requests for existing integrations.
- Streamlined internal operations by developing process trackers, updating technical documentation, and improving knowledge-sharing assets.
- Acted as the Subject Matter Expert (SME) for Workday integrations at Carrier, supporting both project and operational teams with expert-level guidance.

Deloitte | Workday Consultant | AMS

2023-2024 (Jan)

- Handled ServiceNow (SNOW) cases including defect resolution and functional queries related to live Workday integrations.
- Delivered change requests, enhancements, and new integration builds, supporting evolving business requirements and system growth.
- Conducted impact analysis and testing activities for major Workday releases, ensuring compatibility and minimal disruption to existing integrations.
- Monitored and supported integrations in the Production environment, proactively addressing failures and performance issues.
- Performed Workday Studio performance optimization, fine-tuning integrations for faster execution and improved efficiency.
- Prepared comprehensive documentation including design specs, data mappings, build/test checklists, and Unit Test/UAT plans to support quality assurance and knowledge transfer.
- Supported and maintained multiple inbound and outbound integrations such as PECl, PICOFl, EIB, Document Transformation (DT), Core Connector Worker (CCW), WECl, Studio-based integrations, Workday Web Services, and API calls from Studio.

Deloitte | Workday Consultant | Implementation

2021-2023

- Gathered and analyzed requirements from clients and vendors to define the scope, design, and functionality of Workday integrations.
- Developed outbound integrations using tools such as PECl (ADP-delivered), PICOFl, EIB, Document Transformation (DT), Core Connector: Worker (CCW), WECl, API calls, and Workday Studio to deliver data to external systems.
- Built and supported Workday Studio integrations leveraging Web Services and developed EIB inbound integrations for data ingestion and processing.
- Implemented and maintained integration security, including setup and configuration of ISUs, ISSGs, and security domains.
- Designed integrations using REST/SOAP APIs, HTTP outbound calls, accumulators, and hash maps, enabling robust data transformation and secure communication.
- Managed migration of integrations across tenants using Object Transporter (OX) 1.0 and 2.0, ensuring consistency across environments.

About Me

I have over a year of experience working in the Workday ecosystem, focusing on integration development and support. My work includes building and maintaining integrations using Workday Studio, Core Connectors, EIBs, Studio Starter Kit (SSK) and BIRT. I have also worked with XML and XSLT for data transformation and integration logic.

Alongside integrations, I've gained hands-on experience with calculated fields, custom reports, and business processes, supported by a strong functional understanding of key HCM modules. As part of AMS (Application Management Services) projects, I've been involved in ongoing system maintenance, incident resolution, enhancements, and upgrades to ensure efficient and reliable Workday operations.

Overall, my experience spans both technical and functional areas of Workday, with a focus on delivering stable integrations and supporting continuous improvement of Workday solutions.

Professional Experience

About Me

I'm a dedicated Workday Functional Consultant with 2.2 years of hands-on experience in Workday AMS and Implementation projects, working across HCM, Recruiting, Learning, and Compensation modules. I specialize in data management using EIBs and Advanced Loads, custom report creation, and business process configuration to support efficient HR operations. I've successfully managed multiple project go-lives while handling BAU activities in parallel. Currently, I'm part of a Workday implementation project at Mivada, contributing as both a Functional and Data Consultant, focused on delivering impactful solutions and driving business efficiency through Workday.

I'm passionate about leveraging Workday to simplify HR processes and help organizations achieve greater value and productivity impactful solutions while building strong relationships with clients.

Professional experience

Mivada | Workday Functional Consultant | 2023-Present

- Experienced in data conversion and migration from legacy systems into Workday using iLoads and EIB templates.
- Delivered a wide range of custom reports, from simple to complex, tailored to meet specific client requirements.
- Contributed to redesigning job profiles, compensation grades, grade profiles, and step progression, optimizing organizational structures and compensation frameworks.
- Proficient in creating and loading data into Workday using EIBs, ensuring efficient system updates and maintenance.

Education

- Bachelor of technology**
GITAM University – 2023

Certifications

- Workday Pro HCM Services
- Data Conversion Services for implementers
- Workday Pro Learning Services

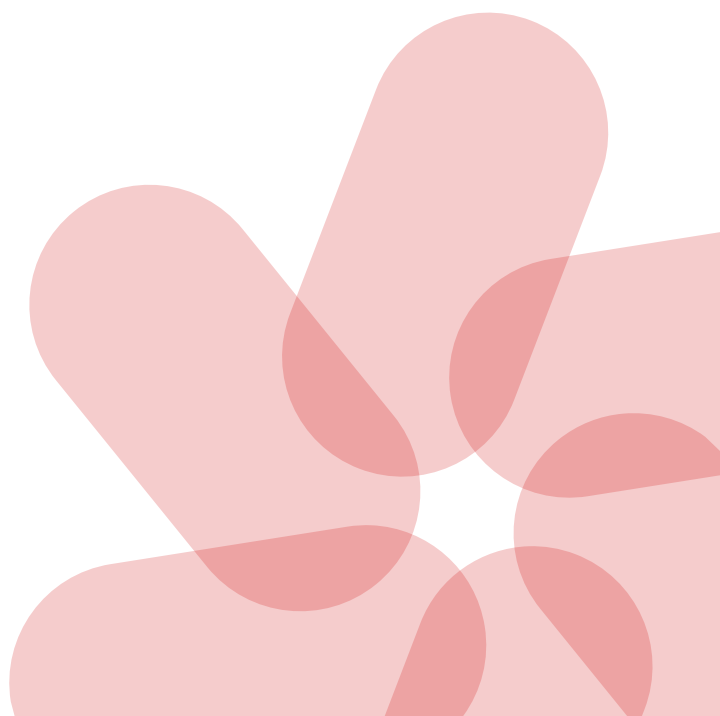

Key skills

- Workday – HCM, Recruiting, Compensation, Learning, Reporting, Recruiting and Workday Docs.
- EIBs, Advance load
- Microsoft – Excel, Power point

Key Clients

- Guzman y Gomez
- Western Sydney International airport
- Mivada (Workday implementation)

- Setup BP Validations, Custom Notifications, Questionnaires, etc.,
- Played a key role in the Extended Learning Project for the Learning module, driving enhancements and delivering impactful solutions.
- Conducted design sessions, provided client-specific solutions, and collaborated to align business requirements with Workday capabilities.
- Managed the activation and inactivation of courses and programs within Workday Learning.
- Designed and generated Workday documents such as offer letters and increment letters to support HR operations.
- Worked on ISU transfers, report scheduling, and alert ownership transfers to streamline system management and reporting processes.
- Contributed to the WSIA testing team, executing and validating various scenarios across HCM, Time Tracking, and Scheduling modules.
- Gathered organizational and worker data using HCM workbooks as part of the initial Workday implementation
- Built an end-to-end testing tenant utilizing tools such as Migration Recipes and Advanced Loads to support configuration and data migration activities.

- Macquarie bank
- AT&T

About Me

Sr. RPA Consultant with 10+ years of hands-on experience delivering automation solutions using Power Automate, Blue Prism, and UiPath. I've worked across Telecom, HR, and Logistics domains, helping teams identify the right processes to automate and then taking ownership from design through development, testing, deployment, and ongoing support. I'm comfortable working directly with business and technical stakeholders, translating requirements into practical, scalable automations that are easy to maintain and aligned with CoE best practices. I bring a senior consultant mindset—focused on quality, clear communication, risk management, and delivery ownership—while also supporting teams through mentoring, code reviews, and driving continuous improvement in how we build and run automations.

Professional experience

Mivada | Senior Consultant – RPA

2022-Present

- Partner with internal and external stakeholders to identify automation opportunities by analyzing processes and assessing feasibility for automation
- Also involves client facing and stakeholder engagement roles.
- Discover areas of improvement on code quality, code reusability, development methodologies, and other technical fields and drive them to implementation within the team
- Identifying risks and forming contingency plans throughout the project life cycle.

Nokia | RPA Technical Lead

2016-2022

- Led solution design, development, and support for 80+ end-to-end automation initiatives for Nokia and its Telecom partner ecosystem.
- Worked closely with business stakeholders to identify automation opportunities, gather requirements, and translate them into scalable RPA solutions.
- Delivered automations covering the complete lifecycle including process analysis, design, build, testing, deployment, and production support.

Quest Global | RPA Program Analyst

2013-2016

- Partnered with Accenture to deliver 20+ automation solutions using the in-house automation tool Fusion.
- Worked closely with the Engineering team to build and enhance the in-house automation platform "Fusion", contributing to core tool development and automation capabilities.

About Me

Trained and experienced in the Microsoft Power Platform, with hands-on involvement in projects using Power Automate, Power Apps, and Dataverse, covering solution design, development, deployment, and support. Strong in building scalable and efficient low-code solutions aligned with business requirements and ongoing operational needs. Certified Blue Prism RPA Developer (AD01) with proven experience delivering end-to-end automation solutions, from design and development to deployment and BAU support. Skilled in stakeholder engagement, requirement gathering, and aligning automation initiatives with business goals. Committed to continuous improvement and driving productivity through sustainable automation strategies.

Professional experience

Mivada | Software Engineer - Automation. 2024 – Present

- Developed and delivered solutions using the Microsoft Power Platform (Power Automate, Power Apps, and Dataverse), handling end-to-end project development while enhancing code to meet evolving business requirements and ensure functional accuracy across automation workflows.
- Analyzed existing logic, updated components, and implemented new features to support seamless, scalable, and efficient process automation.
- Performed code fixes and enhancements across multiple workflows to improve system stability, data accuracy, and production reliability.
- Supported Business-As-Usual (BAU) operations by monitoring automated processes, troubleshooting issues, and resolving issues to maintain consistent performance and uptime.

Sravan Narreddy

About Me

Power Platform Developer with hands-on experience designing and delivering end-to-end solutions using Power Apps, Power Automate, and Dataverse to meet evolving business requirements. Proven ability to develop, enhance, and optimize automation workflows ensuring functional accuracy and alignment with enterprise automation goals. Experienced in analyzing existing logic, implementing new features, and performing code fixes to improve system stability and production reliability. Strong background in managing solutions, deployments, and multiple environments. Actively support BAU operations by monitoring automations and resolving issues to maintain consistent performance and uptime. Backed by prior experience in iOS application development, bringing strong engineering fundamentals and integration expertise. Passionate about continuous improvement and driving business efficiency through scalable Power Platform solutions.

Professional Experience

Mivada | Associate IT Consultant - Automation

2023 - Present

- Developed and delivered multiple Power Platform solutions aligned with business requirements and end-to-end automation goals, ensuring accuracy and production reliability.
- Collaborated with internal and external stakeholders to analyze processes, identify automation opportunities, and support client-facing engagements.
- Enhanced system stability and code quality by analyzing existing logic, implementing new features, fixing workflow issues, and driving reusability improvements.
- Successfully delivered multiple projects through recent onsite experience, working closely with onsite teams and cross-functional stakeholders.

C- TEL Info Systems | Senior iOS Application Developer

2019 - 2023

- Worked on large-scale iOS applications including food delivery, ride-hailing, and enterprise systems, handling end-to-end development, integrations, and production support.

Invent Bird | iOS Application Developer

2018 - 2019

- Developed iOS applications for cab service platforms, focusing on REST API integration, payment gateways, and real-time features.

V.B Solutions | iOS Application Developer

2016 - 2018

- Built and maintained iOS applications for food delivery and business platforms, gaining strong experience in mobile UI development and third-party integrations.
